MANITOBA POPULATION ESTIMATES - July 1, 2002

		July 02	April 02	July 01
POPULATION		1,150,800	Up 1,700	up 1,700
NET MIGRATION	**(January to July)**		**2002**	**2001**
	Interprovincial		-1,484	-1,898
	Total		840	90

Manitoba's total population was estimated at 1,150,800 persons as of July 1, 2002, up 1,700 persons from the April 1, 2002 estimate. Population growth continues on an annual basis, with Manitoba's increase since July 1, 2001 estimated at 1,700 persons, or 0.2%. The majority of Manitoba's estimated population gain over the first half of 2002 was the result of international migration.

We recorded a net loss of 1,484 persons to other provinces through interprovincial migration in the first half of 2002, down 414 persons from a net loss of 1,898 persons in 2001. In the first half of 2002, Manitoba gained population on a net basis chiefly from Saskatchewan (131) and Quebec (124), while most of the losses (as in past quarters) were to Alberta (-864), British Columbia (-412) and Ontario (-342).

Interprovincial migration is generally offset to some degree by other types of population movement (international migration, Canadian citizens returning from abroad, non-permanent residents and Canadians temporarily abroad). When these other forms of population movement are combined with interprovincial migration, Manitoba recorded an overall net migration gain of 840 persons in the first half of 2002, considerably above the net gain of 90 persons in 2001.

Note: Statistics Canada has revised some population components from fourth quarter 1997 to first quarter 2002.

JANUARY 22, 2003

MANITOBA POPULATION ESTIMATES - October 1, 2002

	October 02	July 02	October 01
POPULATION	1,150,300	down 500	up 1,800

NET MIGRATION (January to October)	2002	2001
Interprovincial	-3,898	-4,455
Total	-935	-1,764

Manitoba's total population was estimated at 1,150,300 persons as of October 1, 2002, down 500 persons from the July 1, 2002 estimate. Population growth continues on an annual basis, with Manitoba's increase since October 1, 2001 estimated at 1,800 persons, or 0.2%. The majority of Manitoba's estimated population gain over the first three-quarters of 2002 was the result of Natural Increase.

We recorded a net loss of 3,898 persons to other provinces through interprovincial migration in the first three-quarters of 2002, down 557 persons from a net loss of 4,455 persons in 2001. In the first three-quarters of 2002, Manitoba gained population on a net basis chiefly from Quebec (122) and Saskatchewan (67) while most of the losses (as in past quarters) were to Alberta (-2,105), Ontario (-1,109) and British Columbia (-801).

Interprovincial migration is generally offset to some degree by other types of population movement (international migration, Canadian citizens returning from abroad, non-permanent residents and Canadians temporarily abroad). When these other forms of population movement were combined with interprovincial migration, Manitoba recorded an overall net migration loss of 935 persons in the first three-quarters of 2002, almost half the net loss of 1,764 persons in 2001.

Note to Users:

Cautionary Note on Data Quality:

MBS has recently learned of a serious problem with the quality of Statistics Canada data on interprovincial migration for 2002. Interprovincial migration is a key component of population change for Manitoba.

Statistics Canada normally bases its estimates of interprovincial migration on change of address information contained in Child Tax Benefit files maintained by Canada Customs and Revenue Agency (CCRA). For whatever reason, Statistics Canada has been unable to obtain this information from CCRA for most of 2002. Our understanding is that for the nine months of data released so far, only April and May of 2002 are based on information from the Child Tax Benefit file. Statistics Canada has filled in the missing seven months of data by using "adjusted" estimates for the same months in 2001.

We have no information on the adjustment procedure Statistics Canada has used to produce the missing data. Their release accompanying the third quarter data includes a notice to users stating that "since preliminary interprovincial migration data on the number of children from July to September 2002 were not available, migration data of the preliminary number of children from the corresponding months of 2001 were used."

This situation casts legitimate doubt on the credibility of the current migration and population release from Statistics Canada.
